PROMO CODE: Promo Code

The Nervo-Scope® is a well-established and highly trusted instrument in the field of Chiropractic for identifying heat differentiations along the spine. Since the 1940s, chiropractic professionals have relied on our instrument and its various iterations to accurately pinpoint slight temperature variations, i.e. the areas to focus adjusting. The Nervo-Scope® is widely used in clinics and is a fundamental part of most Technique classes. Every Nervo-Scope® is meticulously hand-crafted and tested at our vertically integrated facility in Danville, VA. At EDL, we take great pride in the knowledge that we produce the highest quality instrument available. We are pleased to offer savings on this essential tool to support you as you begin your practice.

The Nervo-Scope® ETS-9A is our Analagraph-compatible version of the ETS-9 Nervo-Scope®. It is a trusted instrument used in Chiropractic to locate spine subluxations. This version allows for wireless data capture and communication of the glide readings to your PC or laptop. The wireless communication is facilitated through an ergonomic hardware piece that can be easily installed on the ETS-9. The Wireless Analagraph was designed with feedback from a worldwide survey of chiropractors to meet their specific needs. It is sold separately from the ETS-9A Nervo-Scope® and offers real-time response of the glide, allowing the doctor to set levels for the severity of the subluxations. All readings are correlated to the location along the spine for easier analysis and the ability to share findings with patients in a way that they can understand.

The digital Nervo-Scope® Pro-X is used to locate heat differentiations along the spine indicative of subluxations. Available with vertical and horizontal screens, Pro-X is a must have for doctors seeking problematic areas along the spine. Designed with feedback from chiropractors worldwide it incorporates the latest scientific advancements yet maintains the sturdy and trusted features of the original Nervo-Scope®.

Pro-X is packed with features: large full color touchscreen display, dark & light modes, readings in Celsius or Fahrenheit, digital or analog views, "porcelain" housing, rechargeable USB-C battery, auto-off feature, eight sensitivities, and contour flex thermocouple tips with unmatched head adjustability (infant to adult). The instrument is designed to provide reliable, repeatable, & stable readings with each glide. All units come with a 2-year warranty (note thermocouple tips are not covered).

Protect your scope with our wall & desk scope stands! Need a new case? We offer replacement cases too.

Stock up on ProSpray™ wipes to keep your Nervo-Scope® and the entire office germ-free!
